- Rodeo -

Pure, tough and unique, that's what our Rodeo collection is. When cutting patterns of the leather skins, factories hold remains of leather. These remains are crushed and with this we create a new material: Recycle leather.

Recycle leather consists of 70% genuine leather and 30% polyester. Recycle leather is composed of two layers: the underlayer consists of recycled genuine leather which ensures the natural and unique appearance. The leather is protected by a polyester cover layer, which prevents unevenness and makes the fabric a solid combination.

- The key to good lighting -

The key to good lighting is layering it at different heights. Don't rely on only one kind of light source. Mix a variety of overhead and floor or table lamps like our Blown floor lamp with our Blown table lamp.
